

Do you have the right protections in place? Review *CIRMA's Four-Point Risk Preview* with your Information Technology team to quickly assess your organization's cyber risk.

**1** **BACKUPS**

Check this box if your organization keeps segregated backups that are regularly updated and has a 3-2-1 backup strategy in place.

**2** **AUTHENTICATION**

If remote access is available, check this box if your organization uses multi-factor authentication to secure remote system(s), email, and admin account access.

**3** **EMAIL FILTERING**

Does your IT Team utilize an email filtering solution?  
If so, check this box.

**4** **EDR/XDR SOLUTION**

Is there an endpoint detection and response (EDR) solution in place? Yes? Great. Check the first box.  
To enhance your protection, do you have an extended detection and response (XDR) solution in place? Yes? Great. Check the second box.
