

THE LITTLE THINGS PREVENT BIG PROBLEMS

See It. Solve It. Stay Safe.

Simple oversights can lead to fires, injuries, or blocked emergency response. Noticing the little things can protect staff, students, and your school.

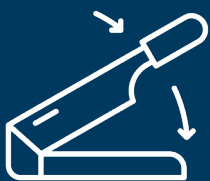

UNPLUG AFTER USE

Reduce fire and tripping hazards by unplugging extension cords when not in use.

DON'T DAISY CHAIN

Never plug extension cords or surge protectors into one another—this can cause dangerous overloads and fires.

LATCH IT SHUT

Always secure and re-latch paper cutters after use to prevent accidental injuries.

KEEP IT CLEAR

Ensure fire extinguishers are visible and easily accessible at all times.

*See It. Solve It.
Stay Safe.*
